El Monte Tower: Then and Now

In 1936, Mr. Nick Lintine began construction of the El Monte Airport. It consisted of 35 acres of land surrounded by dairy land. Pilots used the unimproved wash area as a dirt strip. That area is now the concrete wash located just west of the airport.

The airport changed owners twice before Los Angeles County acquired possession. The first official owner was Mr. K. Livermore, who was followed by Mr. Wanamaker, whom enlarged the airport to its present size of 70 acres.

Los Angeles County leased the airport from Mr. Wanamaker in 1964 and later purchased it in 1969 for 3 million dollars. The runway and taxiway were rebuilt and paved in 1970.

On February 16, 1971, a temporary FAA tower was officially commissioned. The permanent tower was opened on April 26, 1973.

The airport today, consists of one runway which is 3995 ft long and one taxiway. Because of the simplicity of the airport layout, many students come here to learn how to fly at one of the three FBO's located on the airport.
